# Create your own mask

We have some reversable masks for you here.
Some of them you can colour in yourself. Then ask an adult to help cut it out. Use a hole punch to cut the holes or place some blue tac on the table and use a sharp pencil to push through. Then tie a piece of string across, make sure you test that it is the right length first.

Why not ask your parents to share the masks with us on social media using the hashtag #TheComicClub. You can also tag us using @thecomicclubuk
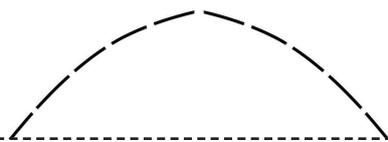

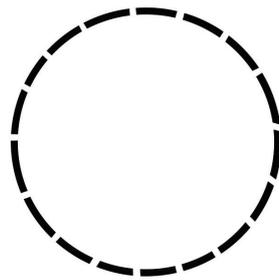

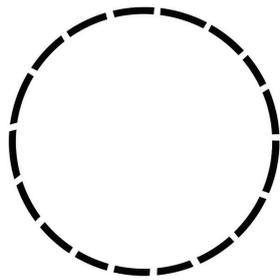

Here are some examples
of masks you could create. Have fun!
